COMPANY BRIEF

Shanghai Kingston Foundry Co. Ltd. is a Chinese-American joint venture company by Kingston Machining & Casting LLC (USA) and Kingston Machine Tool Mfg. Inc. (USA). The company operates two foundry sites in China and both sites hold the prestigious ISO 9001 certification. Our Shanghai Foundry site consists of an area of 23,000m² in which 10,000m² is occupied by buildings and workshops. Our Wu'an Foundry site consists of 99,000m² in which 12,000m² is occupied by buildings and workshops. We have been proudly serving the Iron Casting Industry since 1949.

Shanghai Site Primary Manufacturing Equipments:

1. Taiwanese 5 Power Induction Furnace with 1.5 ton capacity, a Copulas Furnace with 2 ton capacity, and various Molding Production Lines
2. German HERAEUS furnace front Chemical Meter
3. Japanese KOBOTO Sand Testing Tool Set
4. ARL Spark Spectrometer Station and Metallurgical Microscopes
5. Universal Tensile Strength Test Station and Brinell Hardness Test Station
6. Two KAO MING Vertical 2m*1m (78-3/4"* 39-3/8") Machining Center
7. OKK Vertical 800mm*600mm (31-1/2"* 23-1/2") Machining Center

Wu'an Site Primary Manufacturing Equipments:

1. Five Induction Furnaces with capacities ranging from 10 tons, 3 tons, 1 ton, to half a ton and two Copulas Furnaces with capacities of 5 and 3 tons.
2. A 40 T/H Resin Sand Mixer Line, two 15 T/H Resin Sand Mixer Lines, and one Permanent Mold Mixer
3. Six 148 Molding machines and various core making machines
4. Eighteen Traveling Cranes with capacities ranging from 3 tons to 16 tons
5. Spark Spectrometer Station and Metallurgical Microscopes
6. Tensile Strength Test Station and Brinell Hardness Test Station
7. Lathe, Milling, Boring Lathe, and Grinder type Machining Centers

Our most common products consist of Gray Iron HT 150-300 (FCD 150-300) and Ductile Iron QT 400-600 (FCD 400-600) castings. We can manufacture castings ranging from 0.1Kgs to 10 tons for various industries; from pumps, valves, counterweights, manhole covers, machining components, engine exhaust pipes, to kitchenware castings. The main molding processes we use are green sand and resin sand molding, but we also have equipment to support a variety of other molding techniques such as the no bake (air-set), vacuum, and permanent mold process. We provide **engineering, designs, pattern, rough machining, finish machining, heat treatment, painting, powder coating, and product assembly** services. The annual production capacity from our two foundry sites is 35,000 tons of which 80% is exported.

Our Shanghai Foundry site is located in the Jiading district of Shanghai, China. With the Shanghai Harbor and Airport only 30 minutes away from this site, exporting our products have never been easier. Our Wu'an Foundry site is located in the city of Wu'an of Hebei, China. With its annual output of 20 million tons of producible iron from its iron mines, Wu'an is a prime location for manufacturing iron castings.

Providing the world's best products and services to our customers is our mission. Shanghai Kingston Foundry invites all who are interested to visit our offices and foundry sites. We look forward to meeting you!
